DETAILED ACTION

Drawings

The drawings were received on 4/19/06. These drawings are accepted.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

As stated in the previous action:

Both claims 1 and 10 include the limitation of a first shaft (outer shaft) receiving a second shaft (inner shaft). There is a guide block attached to the distal end of the second shaft (inner shaft) having a curved surface. There is a third shaft (rod) slidably disposed within the second shaft (inner shaft). There is an advancement strip with a first and second end. The first end is connected to the distal end of the first shaft (outer shaft) and the second end is connected to the proximal end of the third shaft (rod), wherein the advancement strip is disposed along the curved surface of the guide block.

None of the references teach a guide block with a curved surface attached to the distal end of the second shaft (inner shaft). Additionally none of the references teach an advancement strip that is attached to a distal end of the first shaft (outer shaft) and to the proximal end of the third shaft (rod), wherein the strip is disposed along the curved surface of the guide block. It would not have been obvious to combine references to achieve the claimed invention since there is no teaching or motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
